PROJECT:

CraveKart | React.js, JavaScript (ES6+), Tailwind CSS, Parcel, Swiggy API

- Developed a responsive food ordering web application using React.js with a modern, component-based architecture.
- Integrated live restaurant and menu data through the Swiggy API to display dynamic listings and detailed restaurant information.
- Implemented client-side routing, reusable React components, and state management to provide a seamless user experience.
- Built features such as restaurant search, filtering, menu browsing, loading states, and responsive design using Tailwind CSS and deployed the project on Vercel using Git and GitHub.

OPEN SOURCE EXPERIENCE:

GirlScript Summer of Code (GSSoC) Extended 2024

- Worked with Git, GitHub, pull requests, and issue tracking in a collaborative workflow.
- Contributed to open-source repositories and communicated with maintainers in a distributed environment.
